## FALLINGBROOK

### Fallingbrook Loeb IGA Presents A Ray Friel Recreation Centre Update

#### Ray Friel Sports Centre

The official start of construction of the Ray Friel Sports Centre on Tenth Line Road, just north of the IGA, took place this month. We hope that serious construction will start soon after. There was a snag in that the tenders for the first phase came in 30% over estimates. This may slow down the whole process, and push the opening date past September 1991. But the Township is trying to pay for this with reserve funds, without borrowing, and a higher than anticipated cost will require a longer construction period. Please help the funding by participating in the many Ray Friel fundraising events, such as the raffle tickets.

### Message from the President

Fellow Fallingbrook Residents,

It is with considerable pleasure and optimism that I accepted the nomination to serve as President of the Fallingbrook Community Association for 1990-91.

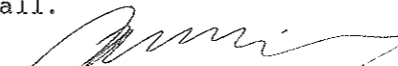

I take great pleasure in living in one of the finest communities in the nation's capital, bar none; and particularly in being afforded the opportunity to contribute to preserving and building upon the terrific quality of life that we enjoy here. Living in Canada's fastest growing residential area has its challenges as well as its benefits; but through the hard work and dedication of your community volunteers, in concert with elected representatives and Township officials, we are able to participate in a wide variety of activities and avail ourselves of an ever increasing array of services, in the context of a well planned urban environment.

I am extremely optimistic that 1990 will be the most enjoyable year yet in Fallingbrook: this year's Canada Day celebration promises to reach new heights in family-oriented fun and entertainment.

While we have a good track record in the fun department, it is heartening to see that our ongoing needs for recreation, education and transportation infrastructure are finally being met with the advent of major projects like the Ray Friel Centre, the new CBE High School, and the long overdue construction of road improvements ( Blackburn Hamlet Bypass; Tenth Line Road reconstruction, etc.)

However, the real source of my optimism stems from knowing and working with a tremendous group of dedicated community volunteers including our 2 past Presidents, George Blake and David Villeneuve; Recreation Committee chairman Paul Pelletier; and the many others whose hard work and personal commitment to Fallingbrook makes my job relatively easy, and your community a great one to live in!

So here's a personal 'thank you' to all our Community volunteers and Association supporters whose contributions benefit us all.

  
Sidney Marinoff

REPORT ON THE ASSOCIATION'S  
ANNUAL GENERAL MEETING  
APRIL 26, 1990

The meeting was called to order  
at 8:10 PM.

Approximately 120 Fallingbrook  
residents attended the  
Community Association's Annual  
General Meeting, despite the  
temptations of the year's best  
weather so far.

The membership approved the  
slate of candidates proposed by  
nominating committee chairman  
Dick Lewis, as follows:

President - Sidney Marinoff  
Vice President - Val Rose  
Treasurer - David Villeneuve  
(Past President)  
Secretary - Debbie Parent

In addition to hearing  
Association highlights from the  
Finance (G. Macdonald),  
Planning (S. Marinoff), Canada  
Day (V. Rose), and Recreation  
(P. Pelletier) committees,  
those attending benefited from  
informative presentations by  
MPP Jean Poirier and Mayor  
Brian Coburn.

Garth MacDonald, the  
Association's outgoing  
Treasurer and past Canada Day  
chairperson was the recipient  
of a 1989 commemorative July 1  
celebration photograph. Several  
local merchants including Rolly  
LaBerge and Bob Janke, along  
with other 1989 sponsors, were  
similarly honoured.

Coffee and donuts were enjoyed  
by all!

The meeting was adjourned at  
10:45 PM.

### Fallingbrook Volunteers Recognized

The Township of Cumberland has recog-  
nized the valuable contributions made by two  
Fallingbrook couples. George and Monique  
Blake have been instrumental in the creation  
of our community association and many other  
community-oriented projects. Paul and Leslie  
Pelletier have been actively involved in recre-  
ation, park planning, fund raising, Brownies,  
etc. Congratulations to both these deserv-  
ing couples and our thanks to them for giving  
their time and energy to make our community  
a better place to live.

### Regional Councillors

The Minister of Municipal Affairs has ini-  
tiated the restructuring of the Regional Mu-  
nicipality of Ottawa-Carleton. Currently the  
council is composed of all the area mayors,  
plus all the Ottawa aldermen, plus extra rep-  
resentatives from the larger municipalities. It  
was time that Cumberland got a second re-  
gional seat, as our population has exceeded  
the threshold. However that has all changed,  
as regional councillors will be directly elected  
within wards which are yet to be determined.  
We would hope that there will be at least one  
ward which recognizes Orleans as an entity.

This also simplifies Cumberland Town-  
ship's problem of changing its municipal ward  
boundaries. At present the urban area is  
grossly under-represented, and a staff report  
has suggested that the present councillor-at-  
large seat, which was being held for the sup-  
posed second regional seat, become an urban  
ward seat. While the new ward boundaries  
would still give more representation per capita  
to the rural area, we feel that it is the best  
which can be hoped for at this time.

## FALLINGBROOK NEIGHBOURHOOD WATCH

### Neighbourhood Watch Update

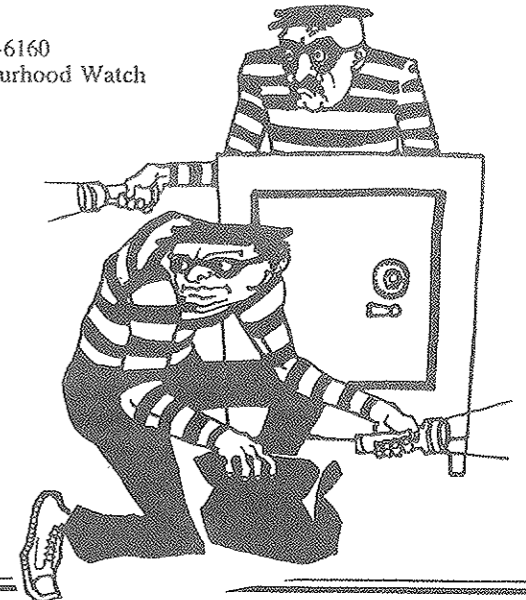

The first order of business is to congratulate Barbara Mclean for the great job she did on her street - Arc en Ciel. She canvassed her street and was able to get no less than 100% participation in the Neighbourhood Watch Program. Well done Barb - it is people like you who make our community a great place to live.

### Tips for a Safe Summer

- Lock all doors and windows including the patio door and garage door when leaving home. Did you know that 15 per cent of all break-ins occur through open/unlocked doors and windows.
- Trim trees and bushes that could block the view of doors and windows.
- If you plan to be away, inform your neighbours and ensure that your home looks occupied - have the grass cut, use timer devices on lights both inside and out, cancel deliveries, have mail picked up, have the neighbour park a vehicle in your driveway.
- Have a safe and happy summer.

If you would like to become involved in the Fallingbrook Neighbourhood Watch program, give me a call and I would be glad to explain the program to your group.

Dave Berry - 837-6160  
Fallingbrook Neighbourhood Watch

## LA FETE DU CANADA FALLINGBROOK 90

Le dimanche 1 juillet 1990  
13h00 - 23h00  
École Communautaire Élémentaire Fallingbrook  
(promenade Princess Louise)

Présenté par  
L'Association Communautaire Fallingbrook

La troisième fête du Canada Fallingbrook promet d'être encore mieux cette année. Une fois de plus, nous vous offrons une journée comblée de plaisirs pour les foules et une alternative impressionnante vis-à-vis la colline parlementaire.

McNeely Engineering	A. J. Robinson and Associates
Realty World McPherson	City of Ottawa
Associated Engineering	Delcan Corp
Taggart Construction Ltd	

# COMMUNITY CORNER

## Tenth Line Construction

We can expect construction to begin on the south half of Tenth Line Road this summer, from Innes to Tompkins / Charlemagne North. This will widen it to four lanes, and provide intersections with proper turning lanes. Two new traffic lights will be added between the two Charlemagnes, as well as one at Innes Road. The posted speed limit will be 70 kph. There will also be construction in the same area for the Ray Friel Sports Centre and the Sir Wilfred Laurier High School, but the contractors intend to keep Tenth Line Road open.

The north end of Tenth Line will be shifted west starting next year, along with the beginning of the Tenth Line interchange to Highway 17. The latest plans call for keeping the present Tenth Line hill open, with two lanes one-way south up the hill, joining the new Tenth Line at the top. Watch for advertisements of the public meeting to review the plans for this phase.

## Home Occupations

We would like to start a column in this newsletter listing the names of people who offer various services from their homes in Fallingbrook. This would be useful for people trying to find a particular talent. This might include piano teachers or other music teachers, art teachers, language tutors, sewing teachers, those offering preschool programs, etc. If you are interested in advertising for free, please leave a short written description in the mailbox at 1613 Proulx Drive (inside Apollo Way).

## Why There Are Craters

A visitor to Fallingbrook immediately notices several large "craters", notably the Apollo Crater, another in Gardenway, and one by St Francis of Assisi school. These are officially known as water management ponds, and are part of the system designed to handle rainwater runoff. The primary stormwater system is composed of the usual storm sewers on each street, which are separate from the sanitary sewers. These sewers are large enough to handle the water flow from most rainstorms, but cannot handle extraordinary rainfalls.

The secondary system is composed of the streets themselves and the stormwater retention ponds. Excess water runs down the streets and into the ponds through depressions in the curbs. The water then fills the ponds and drains away through the primary sewers over a period of hours.

The initial study on stormwater management for Fallingbrook considered the use of wet ponds versus dry ponds. A wet pond has water in it at all times, whereas the dry ones fill only during a storm. The study called for the use of dry ponds such as we have. Concept plans for the new urban area south of Innes (remember before Fallingbrook had a name, we were called "east of Tenth Line"?) show several large wet ponds, lakes really, which might be used for recreational purposes, with beaches and so on.

## No Hand Grenades Allowed

Dangerous sports such as golf and archery are not permitted in any parks in Cumberland. Please respect other users of our parkland.

## Another Elementary School

The CBE has been given authority to purchase a site for another elementary school in the area east of Charlemagne. Unfortunately, they have to wait until 1993, and this doesn't include funding for the school itself. This school is urgently needed to relieve the overcrowding at the Fallingbrook Community Elementary School, which had portables immediately after it opened, and now has 12 portables.

## Community Schools

It is no accident that they put the word *community* in the name of Fallingbrook Community Elementary School. This school is almost continually in use. One has trouble finding a parking spot some evenings. This is very efficient use of government funds, to provide a building which is used from morning to night. Much of the credit for the success of this arrangement should go to the principal, Richard Alton, and his staff, for bending over backwards to encourage use of the building.

## Separate High School Funded

The provincial government announced funding for a new CRCSSB high school in Fallingbrook, to be situated at the east end of Charlemagne at Merkley. Our MPP, Jean Poirier, has been credited with pulling in the funding once again. Trustee Maureen Brassat says that they hope to see it open in September 1992, even though funding will not come until 1993. The school will be designed for 1400 pupils. It is urgently required to relieve overcrowding at St Matthews High School, which has 1600 students, 12 portapacks, 10 portables, and 150 more students coming next year.

## Sir Wilfred Laurier High School

The Sir Wilfred Laurier High School plans are now complete, and tenders are being called for construction. Completion must be by September 1991, when the existing "Swill" is sold to a developer. Initial plans for the school had no stage facilities at all, which would be unique in the Ottawa area. Luckily the CBE planning department was convinced to provide a makeshift stage in the cafeteria. Apparently the Ministry of Education does not fund auditoriums any more, although all new schools seem to have cafeteriums. The school will also contain a day care centre and the Township library which is currently located at Dunning Foubert School. There will be a triple gym, one-third of which will be used by the community for exercise classes, etc. The high school will be physically connected to the pool area of the Ray Friel Sports Centre.
